

Interested in learning how to grow your own food?

Would you like to start eating fresh, seasonal, affordable foods?

Take Biol 801: Biology of Growing Food at Laney College in Spring 2012

WHEN: Saturdays from 10 am – 12 noon, March 3rd - April 14th

WHERE: Laney's edible garden (near E-building and Laney Bistro, a short walk from Lake Merritt BART)

COST: \$60 for 12 hours instruction

INSTRUCTORS: Grey Kolevzon and Doug Bruce

Biol 801 is designed for students with limited or no gardening experience. We will learn the basics of growing edible plants for household production, garden design and layout, composting, soil preparation, planting, maintenance, and harvesting. We will work in Laney's edible garden which supports the Culinary Arts program and Laney Bistro!

Grey Kolevzon has helped develop many school and community gardens in the East Bay and is a long-time advocate of local food systems. He works for Cycles of Change and PUEBLO. **Doug Bruce** is a biology instructor at Laney College and Diablo Valley College. In addition to being an avid gardener, he teaches human nutrition, human anatomy and physiology, and biomanufacturing.

RESERVE YOUR SPOT IN THE CLASS by sending an email to dbruce@peralta.edu. We'll contact you in January with registration information.
